Dams, Bridges, Building, Railways, Roads(including Asphalt layer measuring), Pipeline, Transmission & Overhead lines (Electricity) , Underground utilities, Underground Storage Tanks (UST), Concrete inspection, Non-destructive testing (NDT Engineering), Wind Energy, Soil investigation, Peat surveys. Rivers & lakes depth mapping, Utility detection and mapping Locate service hidden/underground connections.

Utility Locating - for utility companies buried services are assets that need to be protected.

Utility Mapping - to locate and map utilities before any excavation begins is a concern to everyone involved.

Underground Storage Tank (UST) Location - GPR can locate Underground Storage Tanks (UST) and any associated underground piping.
